A72 Concentrations - DRAFT09-10-2015.docx

Hi, Dan.

Steve asked me to forward on a working document regarding estimated concentrations at A72 and Bakers Bridge. Please consider it a very draft document. I'm sending on the version I sent to Steve and Rob Runkel, but this morning I noticed that the headers on Table 8 are misleading. They should read the same as the headers on Table 7.

I will also forward you 2 tables that summarize information on the tables in Sections 4 and 5. This summary tables have extra columns that show estimated concentrations if we assume the

CBI/Ex. 4

Let me know if you have questions, comments, clarifications, etc.

See attached to see where the current evaluation is going. All numbers need to be checked before this goes out and I will make sure that gets done when we confirm the methods/GKM load that should be used.

The document:

CBI/Ex. 4

Let me know what needs to change and where I should go forward. Would an overall summary table help for sections 4 and 5?

Jan
